From: Dagmar Jirová, M.D., Ph.D.

Date: 10.12.2003

On your request we have assessed the following materials with regard to their contact with skin:

**tattooing colors STARBRITE**

Importer: Tattoosupplies.uk, 9/11 East Fountain Bridge, Edinburgh, Scotland EH3 9BL

The list of color shades is in Annex 1.

We have evaluated the submitted samples of materials and relevant documentation including composition and material characteristics.

On the basis of reports on chemical analyses, microbiological examination performed by testing laboratory Analab Praha, s.r.o., Praha 10 and of evaluation of documents provided with the products it is possible to designate the products as

*safe for human health when coming into contact with human skin provided their microbiological safety is ensured (product No. 1069 has to be sterilised before use).*

*In the scope of performed chemical and microbiological tests the above mentioned products are in compliance with valid requirements and generally binding regulations concerning the safety of the product material, namely Act No. 102/2001 Coll.*

This conclusion can be applied only to the submitted samples and those products whose composition and qualities are identical to the tested products.

The submitted samples were used up for the purpose of testing.

Annexes: Annex 1 - list of products

Examination Record No. 1038-1069/K/03

Supplement of the Examination Record I - chemical analysis No. 1038-1069/K/03

Supplement of the Examination Record II - microbiological analysis No. 1038-1069/K/03
